

Extra Story Problem Practice

Directions: Decide whether you should divide or multiply. Solve the problem and label your answer.

1. A walnut weighs about $\frac{1}{10}$ of an ounce. Jody has 32 ounces of walnuts. About how many walnuts does she have?
2. Kaitlin has 150 stamps. Of these stamps, $\frac{1}{5}$ are red. How many red stamps does she have?
3. Mark is running 7 miles for a race. He decides to break the run into 3 equal lengths. How long will each part of his run be?
4. Devin spends 5 hours a week babysitting. His friend Jake spends $\frac{7}{8}$ as much time at work. Who works more? How many hours does Jake work during the week?
